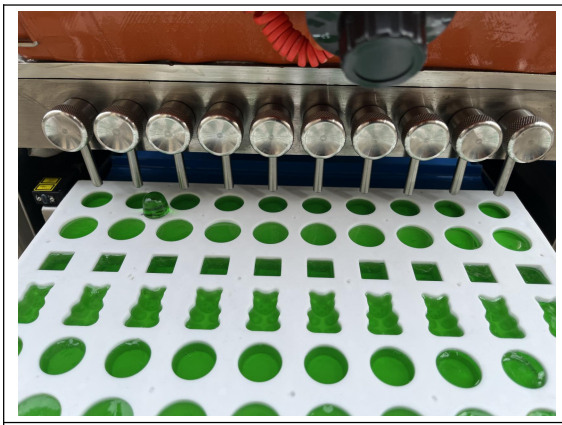
CX-30Q Gummy candy making machine

Machine details



Features of this line :

CX-30Q was specially innovated by our R&D department according to the market, which can produce gummy with multiple shapes and variety colors based on the advanced technology process. It is an ideal machine to produce superior quality gummy. By change-over molds or depositors, different color and different shape of gummy can be also produced. This gummy machine production line mainly consists of cooker, candy depositor, conveyor and molds.

This machine is the new design of company, which is accurate and durable than previous model. It has a 25L tabletop cooker. You can put the ingredients into it for dissolving, cooking and mixing. After the syrup is cooked, you can choose forward discharge or front bottom butterfly valve discharge to pour the syrup into the hopper of the depositor.

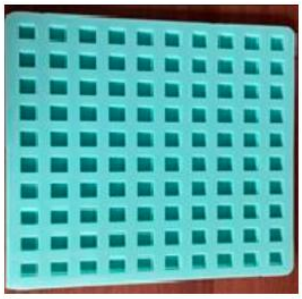
It can deposit different kinds of shapes. Then you can press the touch screen to deposit the syrup into the molds. You can set the programme to change the depositing volume, etc. It has 10 adjustable detachable nozzles and servo PLC control for precise depositing.

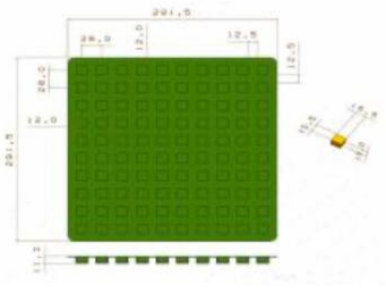
Parameter:

Capacity	20kg/h
Total power	~6kw
Voltage	customized
Candy weight	customized
Working Condition	Room temperature
Compressed air condition Compressed air pressure	0.2m3/min 0.4-0.6mpa
Depositing speed	10-20n/min
Machine length	1200*1000*1700
Machine Weight	200kg

Mold

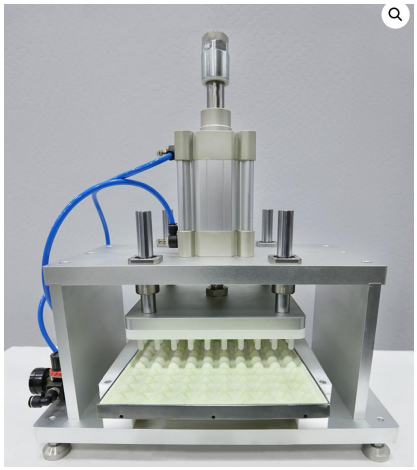
Molds are made of silicone, and the shape can be customized.



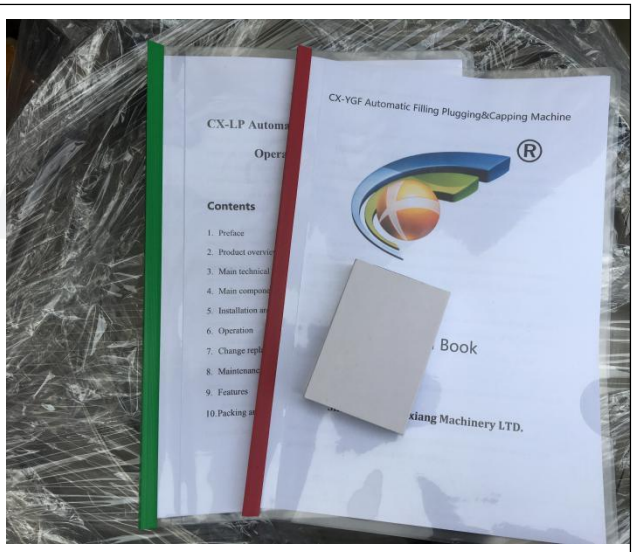


Demould:

Control by air cylinder,makes the candy come out



Packing & Shipping Details



These are tool box&quick-wear parts,Reference machine manuals&USB Operation Video

We cleaned all machines before shipment and daub lubricating oil to prevent rust during sea transportation
